Peptides

Semaglutide or Tirzepitide Peptide - FDA

Approved chronic weight management in obese/overweight adults.

Pricing depends on dosage and peptide.

- Improve feeling of satiety
- Improve cardiac & liver function
- Improve cholesterol
- Improve insulin effectiveness & blood sugar control

Sermorelin Peptide - Promotes weight loss, anti-aging, & development of lean muscle growth.

- Steady, sustainable weight loss
- No starvation level calories
- Don't have to cycle off

Benefits beyond Weight Loss

- Natural growth hormone release
- Better Sleep
- Retain muscle mass

\$300/month

Weight Loss Programs

\$650 per month

Validated Results– We offer a combination of the peptides we offer (semaglutide or tirzepitide & sermorelin). Semaglutide controls those cravings and promotes faster weight loss, while sermorelin works to improve your metabolism long-term.

*Some Limitations apply

All Weight Loss Programs come with weekly support from a medical professional to help ensure your success.

Skin Creams

Anti-Aging Vitamin Skin Gel- Treat acne, fine lines, dark spots, and/or rough skin by keeping the pores clean, reducing inflammation, building proteins in the skin, & protecting against environmental damage. \$150/bottle

NAD+ Skin Cream - Topical NAD+ has been shown to reduce fine lines and wrinkles, repair and protect from sun damage, and support new collagen formation. As we age, the levels of NAD+ present in our bodies begin to decline. Diminishing levels of NAD+ cause aging to become visible. \$150/bottle

Lipo-Sculpt Skin Cream: Block the availability of cortisol in the fat cells, smooth skin, increase skin's moisture, support skin regeneration & decrease overall size of waist, thighs, & other problem areas. \$150/bottle
